

PATIENT DETAILS

ID Number:
DN599786

Patient Name:
HILDAH HUNI

Date of Birth:
1983/07/20

Age:
39

Sex:
FEMALE

Contact Number:
0845899764

Email:
N/A

LAB DETAILS

Lab reference Number:
001639920

Collection site: **Midrand Hub**
Collection date: **2022-03-19 13:45:00**

Receive date:
2022-03-19 13:45:00

Report date:
2022-03-19

REFERRING DOCTOR DETAILS

Referring Doctor:
Dr Yvonne Holt

SUMMARY OF RESULTS

SARS-CoV2 [COVID-19]
RT-PCR test

Negative

SARS-CoV2 is a novel coronavirus responsible for COVID-19. The test for the virus performed here is a polymerase chain reaction (PCR) test that directly detects the viral nucleic acid and if positive is indicative of an active infection with SARS-Cov2. Symptoms associated with SARS-Cov2 infection may be absent, mild or severe and include loss of taste and smell, fever, dry cough, headache, muscle and body aches, difficulty breathing and less commonly gastrointestinal symptoms. The SARS-CoV2 virus is extremely contagious and is a notifiable disease. If positive, self-isolation is imperative and contact from health authorities can be expected to trace contacts and ensure limiting of transmission of the infection to others.

The sensitivity of the above test may be affected by the timing of sampling in the course of infection and by sampling technique. If negative, repeat testing may be required in the case of a positive contact or symptoms consistent with SARS-CoV2 infection. Contact your health care provider for advice if required.
